Dynamic Survey Reporting Tool – Published May 4, 2021

**Global HR Pulse Survey:
Preparing For the Future: How COVID-19 is
Changing How and Where People Work Forever**

Study Overview

As the humanitarian and economic impact of the COVID-19 pandemic continues to unfold, we once again turned to leaders in the global HR community to understand how companies are adjusting their workforce strategies in response to the current environment.

The design of this study reflects a broad partnership between clients—many of whom submitted questions to us in advance of this project—and numerous teams at Aon, including the firm's benefits, employee communications, health, human capital strategy, retirement, rewards and talent assessment practices, among others.

We thank our clients, colleagues, and all of our study participants for their contributions to this project at a time when we all continue to face personal and professional challenges.

On an overall basis, this global study, conducted from April 20 to April 28, 2021, Garnered submissions from a total of 1,451 organizations. Depending on the filters you select, your dynamic report will include a subset of these participants.

When interpreting study results, we ask all readers to consider the following:

The COVID-19 pandemic continues to evolve on a daily basis, with varying levels of impact by geography and industry. This pulse survey reflects a point-in-time snapshot of HR and workforce practices reported between April 20 and April 28, 2021. We remind readers that experiences will vary widely within any given country or from one organization to another. For these reasons, we continue to pulse the market to monitor changing practices.
